(a) Fraction of agents in the light over time

Fraction of agents in the in the light

Temps (min)

(b) Mean score over time

Mean score

Temps (min)

(c) Mean weight over time

uniform

Mean weight

Temps (min)

(d) Weight standard deviation over time

$\alpha_{\mathcal{M}} = 10^{-4}$
$\alpha_{\mathcal{M}} = 10^{-3}$
$\alpha_{\mathcal{M}} = 10^{-2}$
$\alpha_{\mathcal{M}} = 10^{-1}$
$\alpha_{\mathcal{M}} = 10^{0}$
$\alpha_{\mathcal{M}} = 10^{1}$

Weight Standard deviation
